THE 2009 VIETNAM
POPULATION AND HOUSING CENSUS
OF 00.00 HOURS 1ST APRIL 2009
EXPANDED SAMPLE RESULTS

HANOI, DECEMBER 2009

Indicator name	Unit	No.
1. Population size and growth		
Total population	Person	[1]
Total of households	Household	[2]
Growth rate of population	Percentage	[3]
Sex ratio	Males/100 females	[4]
Sex ratio at birth	Male births/100 female births	[5]
Proportion of population aged 0-14	Percentage	[6]
Proportion of population aged 60 and over	Percentage	[7]
Aging index	Percentage	[8]
Proportion of population urban	Percentage	[9]
Growth rate of urban population	Percentage	[10]
Crude birth rate in the past 12 months (CBR)	Per thousand persons	[11]
Total fertility rate in the past 12 months (TFR)	Children per woman	[12]
Population density	Persons per km ²	[13]
2. Marital status		
Proportion of single population	Percentage	[14]
Proportion of currently married population	Percentage	[15]
Singulate mean age at marriage (SMAM)	Age	[16]
3. Migration in the past 5 years		
In-migration rate in the past 5 years	Per thousand	[17]
Out-migration rate in the past 5 years	Per thousand	[18]
Net-migration rate in the past 5 years	Per thousand	[19]
4. Education		
Literacy rate of population aged 15 and over	Percentage	[20]
Proportion of population not completed primary school	Percentage	[21]
Proportion of population completed primary school	Percentage	[22]
Proportion of population completed lower secondary school	Percentage	[23]
Proportion of population completed higher secondary school and over	Percentage	[24]
5. Professional and technical qualifications		
Proportion of population with short-term training certificate	Percentage	[25]
Proportion of population with vocational degree	Percentage	[26]
Proportion of population with college degree	Percentage	[27]
Proportion of population with bachelor and higher degree	Percentage	[28]
6. Disability		
Percentage of population with no disability	Percentage	[29]
Percentage of population with disability of vision or hearing or movement or cognition	Per thousand	[30]
7. Labour force in working age		
Employed population	Persons	[31]
Unemployed population	Persons	[32]
Labour force participation rate	Percentage	[33]
8. Employed population of working age		
Proportion of employed female	Percentage	[34]
Proportion of population working in agriculture, forestry and fishing	Percentage	[35]
Proportion of population working in industry and construction	Percentage	[36]
Proportion of population working in services	Percentage	[37]
9. Unemployed population of working age		
Proportion of unemployed females	Percentage	[38]
Urban unemployment rate	Percentage	[39]
Rural unemployment rate	Percentage	[40]
10. Housing status		
Percentage of housing permanent	Percentage	[41]
Percentage of housing semi-permanent	Percentage	[42]
Percentage of housing less-permanent	Percentage	[43]
Percentage of housing simple-permanent	Percentage	[44]
Percentage of houses private	Percentage	[45]
Percentage of houses rented/borrowed	Percentage	[46]
Percentage of houses with unclear ownership	Percentage	[47]
Floor space per capita	Square meters/person	[48]
Percentage of households using safe water	Percentage	[49]
Percentage of households using hygienic toilet facilities	Percentage	[50]
Percentage of households using network electricity for lighting	Percentage	[51]
Percentage of households using television	Percentage	[52]
Percentage of households using fixed telephones	Percentage	[53]

CENTRAL POPULATION AND
HOUSING CENSUS
STEERING COMMITTEE

THE 2009 VIETNAM
POPULATION AND HOUSING CENSUS
OF 00.00 HOURS 1ST APRIL 2009

EXPANDED SAMPLE RESULTS

HANOI, DECEMBER 2009

INTRODUCTION

The 2009 Population and Housing Census 15 percent sample data has been processed in the just under eight months since the end of the fieldwork. The Central Population and Housing Census Steering Committee has compiled and released this publication “Expanded sample results” to meet the immediate need for these results by managers, policy makers and researchers.

This publication comprises the most important 53 indicators of the expanded sample results. For convenience of reference, this publication has been designed in a pocketbook format.

We are pleased to present this publication to all audiences. Despite of our great efforts in calculation and compiling for the publication, it is hardly free of shortcomings and limitations. We wish to receive constructive comments from readers so we can draw helpful lessons for our work.

I. NOTE

1. For convenience of data use and to avoid confusion, some notes, concepts and definitions are shown in this part and the next one.

Besides the calculation unit of each indicator displayed in the respective row, indicators are separated into groups and numbered in order from [1] through [53] on the left or on the right of the data page to facilitate locating results. For brevity of presentation, thereafter the order number of each indicator is used as its name.

2. Group of indicators of [14] through [16], [20], and [25] through [28] are calculated for population aged 15 and over.

3. Indicators [17], [18] and [19] are calculated for the duration of 5 years prior to the Census time-point, and refer to persons ages 5 and over at the Census time-point.

4. Group of indicators of [21] through [24] and [29] through [30] are calculated for population aged 5 and over.

5. Indicators from [31] through [40] are calculated for population in working age, namely, male in the age group of 15-59 and female aged 15-54.

6. Indicators from [41] through [48] are calculated for housing in which households are residing.

7. Indicators from [49] through [53] are calculated for households.

8. Indicators are presented for 6 socio-economic regions and for provinces and cities administered directly by the central government.

II. SOME CONCEPTS AND DEFINITIONS

2.1 Population size and growth

Total population is number of usual residents at time-point of 0 hour 1st April 2009. A person is considered as “a usual resident” of a household if he/she has actually lived in that household for 6 months or more by the time-point of the Census enumeration; or has recently moved to live permanently in that household, irrespective of whether he/she was registered as a permanent resident or not.

The following persons are included in this category:

- a) Persons who lived permanently in the household for 6 months or over by time-point of the Census enumeration;
- b) Persons who had recently moved to live permanently in the household less than 6 months preceeding the Census time-point, included newborn babies;
- c) Persons who lived permanently in the household but were currently absent, comprising Vietnamese persons who have been permitted by authorities to go overseas for an assigned duration of time;
- d) For persons who were homeless on the night of the Census enumeration, they were enumerated and considered as usual residents at the places where they slept.

A household comprises either one person living alone or a group of people living in the same dwelling and sharing meals together. For households with 2 persons or over, its members may or may not share a common budget; or be related by blood or not; or in combination of both.

Growth rate of population is expressed as a percentage at which a population is increasing (or decreasing) on average in a year for the period of 10 years between two censuses (1999-2009).

Sex ratio is the ratio of males to females, usually expressed as the number of males for every 100 females.

Sex ratio at birth is the ratio of male births to female births, expressed as the number of male births for every 100 female births among total births in 12 months prior to the census.

Aging index is expressed as the number of persons aged 60 and over to every 100 persons aged less than 15.

Proportion of population urban is the urban population divided by the total population, expressed as a percentage.

Urban area includes urban districts and wards within a city or town. All other base administrative units (communes) are rural.

Crude birth rate in the past 12 months indicates the number of live births in the 12 months prior to the Census, per 1,000 persons.

Total fertility rate in the past 12 months is the average number of children that would be born to a woman by the time she ended childbearing if she were to pass through all her childbearing years conforming to the age-specific fertility rates of the 12 months preceeding the Census.

Population density is the average number of persons residing in a territory, divided by the area of that territory in square kilometers.

2.2 Marital status

Single (never married) describes a person who has never married or lived with a person of the opposite sex as a married couple.

Currently married describes a person who is recognized by the marriage laws or customs of the locality as married or living with a person of the opposite sex as a married couple.

Singulate mean age at marriage is the average number of years that persons at a Census time-point would live single in their lifetimes, if these persons had a single level by age the same as the proportions single collected at the Census time-point.

2.3 Migration in past 5 years

In-migration rate indicates the number of in-migrants from other territorial units arriving in the territorial unit during an observed period per 1,000 persons ages five or over at that destination.

Out-migration rate indicates the number of out-migrants departing from a territorial unit during an observed period per 1,000 persons ages five or over in that territory.

Net-migration rate is the difference between in-migration rate and out-migration rate. This figure has positive value if number of im-migrants is more than number of out-migrants; that has negative value if number of im-migrants is less than number of out-migrants.

The territorial units of in-migration and out-migration in this publication are provinces and cities administered by the central government.

2.4 Education

Literacy rate of population aged 15 and over was the percentage of persons aged 15 and over who are literate relative to the total population aged 15 and over.

A person is considered as literate if that person is be able to read, write and understand fully a simple statement in Vietnamese or an ethnic or foreign language.

A person is considered as having *not completed primary school* if he/she had ever attended school without completing primary school (including persons who had attended the last grade of primary level without graduation).

A person is considered as having *completed primary school* if he/she had ever attended and completed primary school (including persons who had attended lower secondary school without graduation at this level).

A person is considered as having *completed lower secondary school* if he/she had ever attended and completed lower secondary school (including persons who had attended higher secondary school without graduation at this level).

A person is considered as having *completed higher secondary school and higher* if he/she had ever attended and completed higher secondary school, attended and graduated or not graduated a higher level of higher secondary such as college, bachelor, master or doctor.

2.5 Professional and technical qualifications

A person is defined as having "*Short-term training level*" if his/her highest professional or technical qualification was a certificate from a short-term training course or vocational training course of less than 3 months.

A person is defined as having a "*Vocational degree*", if his/her highest professional and technical qualification was obtained from a vocational training course or trade vocational training course.

A person is defined as having "*College level*", if his/her highest professional or technical qualification was obtained as a degree from a college or trade college course.

A person is defined as having "*Bachelor and higher level*" if he/she was trained and received a university degree of bachelor, master or doctor.

2.6 Disability

There are 4 questions on disability of major 4 functions: vision, hearing, movement (walking) and cognition (paying attention to). These questions are asked for members aged 5 years and over of the household. Disability is self-evaluated and classified into the following 4 types: "*No difficulty*", "*Difficulty*", "*Very difficulty*" and "*Unable*".

A person is defined as "*With no disability*" if he/she has all above-mentioned 4 functions classified into "*No difficulty*".

A person is defined as “*No ability of vision or hearing or movement or cognition*” if he/she has at least one of the mentioned 4 functions classified into “*Unable*”.

2.7 Labour force in working age

Employed population includes persons who were working in the week prior to the Census enumeration. Work means all engagements in economic activities (not prohibited by law) of at least one hour to produce income.

Unemployed population includes persons who did not work but were actively looking for a job and were available for work.

Labour force includes the employed population and the unemployed population.

Labour force participation rate is defined as the percentage of persons in the labour force to the total population, defined for persons ages 15 and over.

2.8 Employed population of working age

Proportion of employed females was the percentage of employed female to the total employed.

Following the 2007 Vietnam Standard Industrial Classification, there are 21 major group *Broad Industrial Categories* are defined from these as follows: Category 1 includes group A “*Agriculture, forestry and fishing*”. Category 2 includes groups B through F and is called “*Industry and Construction*”. Category 3 includes major groups G through U and is labeled “*Services*.”

2.9 Unemployed population of working age

Proportion of unemployed female was the percentage of unemployed female among total unemployed.

Unemployment rate was the percentage of unemployed among total employed in labour force.

Urban unemployment rate was the unemployed rate in labour force in urban area.

Rural unemployment rate was the unemployed rate in labour force in rural area.

2.10 Housing status

Type of house was defined according to the main construction material of three important components. These are the *pier* (the pivot or the load-bearing wall), the *roof* and the *outer walls*.

The Pier is called *solid* if it was made by one of three main construction materials as follows: “concrete”, “brick/stone”, “steel/iron/durable wood”.

The Roof is called *solid* if it was made by one of two main construction materials as follows: “concrete”, “tile (cement, terra cotta)”.

The Outer wall is called *solid* if it was made by one of three main construction materials as follows: “concrete”, “brick/stone”, and “wood/metal”.

Permanent housing includes houses having all three important components defined as *solid*.

Semi-permanent housing includes houses having two among three important components defined as *solid*.

Less-permanent housing includes houses having only one among three important components defined as *solid*.

Simple permanent housing includes houses having no any among three important components defined as *solid*.

Safe water is defined as coming from an indoor or public tap, water drilled well, a protected dug well or rain water.

Hygienic toilet facilities are flush toilets with septic tanks and sewage pipes.

No.	Indicator name	Unit
1. Population size and growth		
[1]	Total population	Person
[2]	Total of households	Household
[3]	Growth rate of population	Percentage
[4]	Sex ratio	Males/100 females
[5]	Sex ratio at birth	Male births/100 female births
[6]	Proportion of population aged 0-14	Percentage
[7]	Proportion of population aged 60 and over	Percentage
[8]	Aging index	Percentage
[9]	Proportion of population urban	Percentage
[10]	Growth rate of urban population	Percentage
[11]	Crude birth rate in the past 12 months (CBR)	Per thousand persons
[12]	Total fertility rate in the past 12 months (TFR)	Children per woman
[13]	Population density	Persons per km ²
2. Marital status		
[14]	Proportion of single population	Percentage
[15]	Proportion of currently married population	Percentage
[16]	Singulate mean age at marriage (SMAM)	Age
3. Migration in the past 5 years		
[17]	In-migration rate in the past 5 years	Per thousand
[18]	Out-migration rate in the past 5 years	Per thousand
[19]	Net-migration rate in the past 5 years	Per thousand
4. Education		
[20]	Literacy rate of population aged 15 and over	Percentage
[21]	Proportion of population not completed primary school	Percentage
[22]	Proportion of population completed primary school	Percentage
[23]	Proportion of population completed lower secondary school	Percentage
[24]	Proportion of population completed higher secondary school and over	Percentage
5. Professional and technical qualifications		
[25]	Proportion of population with short-term training certificate	Percentage
[26]	Proportion of population with vocational degree	Percentage
[27]	Proportion of population with college degree	Percentage
[28]	Proportion of population with bachelor and higher degree	Percentage
6. Disability		
[29]	Percentage of population with no disability	Percentage
[30]	Percentage of population with disability of vision or hearing or movement or cognition	Per thousand
7. Labour force in working age		
[31]	Employed population	Persons
[32]	Unemployed population	Persons
[33]	Labour force participation rate	Percentage
8. Employed population of working age		
[34]	Proportion of employed female	Percentage
[35]	Proportion of population working in agriculture, forestry and fishing	Percentage
[36]	Proportion of population working in industry and construction	Percentage
[37]	Proportion of population working in services	Percentage
9. Unemployed population of working age		
[38]	Proportion of unemployed females	Percentage
[39]	Urban unemployment rate	Percentage
[40]	Rural unemployment rate	Percentage
10. Housing status		
[41]	Percentage of housing permanent	Percentage
[42]	Percentage of housing semi-permanent	Percentage
[43]	Percentage of housing less-permanent	Percentage
[44]	Percentage of housing simple-permanent	Percentage
[45]	Percentage of houses private	Percentage
[46]	Percentage of houses rented/borrowed	Percentage
[47]	Percentage of houses with unclear ownership	Percentage
[48]	Floor space per capita	Square meters/person
[49]	Percentage of households using safe water	Percentage
[50]	Percentage of households using hygienic toilet facilities	Percentage
[51]	Percentage of households using network electricity for lighting	Percentage
[52]	Percentage of households using television	Percentage
[53]	Percentage of households using fixed telephones	Percentage
