GENERAL STATISTICS OFFICE

REPORT
ON LABOUR FORCE SURVEY
Quarter 1, 2015

Ha Noi, 2015

INTRODUCTION

On 10 November 2014, the General Director of General Statistic Office issued Decision No 1287/QĐ-TCTK on the 2015 Labour force survey, along with its survey plan. The purpose of the survey was to collect the information on 2015 labor market participation from those people who are 15 years old and above currently residing in Vietnam; regarded as a basic for aggregating and compiling national statistical indicators on labor, employment, unemployment and income. These results would support for ministries and branches assessing and comparing the changes in labour market among quarters within the reference year as well as with those of previous annual labour force surveys conducted by GSO. These results would be also considered as a basic to develop and plan policies on human resource development; activities of investment, production and business accordant with the development trend on labor market; as well as to access and apply International Labor Organization's updated recommendations on labor and employment, especially in term of "labor under-utilization" into the reality of Vietnam. The statistics would be aggregated quarterly for the national and regional levels; and yearly for the provincial level.

This report would present major findings of labour force survey in quarter 1, 2015 in order to provide information about labour market and employment for users. As a result of the survey coverage on labor market only relating to those people who were 15 years old, currently residing in Vietnam at the survey period, therefore, the indicators on labor and employment presented in this report would mainly be calculated for those persons aged 15 and above. However, due to the demand of researching, assessing and analyzing information about the labour market and employment situation for the working age group (including males aged from 15 to 59 and females aged from 15 to 54), the report would also provide some basic indicators on labor and employment for this group.

The 2015 Labor force survey has received technical supports of International Labor Organization (ILO). GSO highly appreciates these

supports and wishes to continuously receive more supports from ILO in succeeding surveys.

GSO hopes that this report will meet requirements of basic information for social economic policy markers, especially for those who are engaging into the field of labor and employment. We warmly welcome all constructive comments from readers.

Sincere thanks./.

I. SUMMARY

- As of Quarter 1, 2015 Vietnam has reached to 70 million persons aged 15 and above, of which 53.6 million people joined into the labour force. Even the fact that the urbanization process has been going on, the rural labour force is continuously considered as dominant, currently accounting for 68.4% of total labour force.
- The labour force participation rate stood at 77.3%. The considerable difference on labour force participation between rural and urban areas has remained, standing at 10 percentage points (70.9% against with 80.7%). Besides, the sex gap on labour force participation has also been found. This participation rate of females was 72.4%, with 10.2 percentage points lower than that of males (82.6%).
- As of Quarter 1, 2015 the labour force of whole country was constituted by 52.4 million employed labourers and more than 1.2 million unemployed labourers.
- The employment to population ratio of those people aged 15 and above was 75.6%. There was a considerable gap on this ratio between urban and rural. The employment to population ratio in urban areas reached to 68.6%, with 10.7 percentage points lower than that of rural areas.
- Based on number of working hours, at the whole country, there were 1.2 million underemployed labourers. The underemployed population was added about 21.9 thousand labourers, as compared to that of Quarter 4 in 2014. 84.7% of total underemployed population was currently residing in rural areas.
- In Quarter 1, 2015, the general unemployment rate has increased slightly (standing at 2.27%). The unemployed population was supplemented to 162.2 thousand labourers, as compared to that of the same period of 2014, currently reaching to 1214.9 thousand labourers.
- The young unemployment rate (for those people aged from 15 to 24) was 6.60%. Number of unemployed youth accounted for 48.2% of total unemployed population. Of which, the urban share was found lower than that of rural areas (44.9% verse 55.1%). Meanwhile, the underemployed youth just accounted for one fourth of total underemployed population.

Some key indicators of the labor market

Indicator	Quarter 2, 2014	Quarter 3, 2014	Quarter 4, 2014	Quarter 1, 2015
1. Population aged 15⁺ ('000 persons)	69313,3	69 691,5	70 057,9	69 750,2
Male	33695,9	33 974,4	34 022,3	33 928,5

Rural	1,20	1,67	1,52	1,95
13. Unemployed youth ('000 persons)	384,7	543,8	448,4	586,2
Male	201,1	275,7	195,8	300,5
Female	183,6	268,1	252,6	285,7
Urban	191,4	216,6	195,2	263,4
Rural	193,3	327,2	253,2	322,8
14. Youth's unemployment rate (%)	5,09	7,02	6,17	6,60
Male	4,85	6,48	4,97	6,25
Female	5,38	7,68	7,59	7,03
Urban	10,65	11,27	10,43	10,95
Rural	3,35	5,62	4,69	4,99

Note: These above indicators were calculated for those persons aged 15+, except for the working age unemployment and underemployment rates that were calculated for men aged from 15 to 59 and for women aged from 15 to 54 and also except for youth's indicators that were calculated for those persons aged from 15 to 24.

II. MAJOR FINDINGS

1. Labour force

1.1 Size and distribution of labour force and labour force participation rate

As of Quarter 1 2015, the labour force aged 15 and above in Vietnam reached to 53.6 million people. Despite of the increase on share for urban labour force, approximately 68.4% of the labour force in Vietnam has been residing in rural areas. Three regions occupying the highest relevant proportions namely in descending order as Red River Delta, North and South Central Coast and Mekong River Delta accounted for 63.0% of total labour force. As of Quarter 1, 2015, females constituted about 48.1% (equivalent to 25.82 million persons) to total labour force.

Table 1: Percentage distribution of labour force and labour force participation rate classified by urban/rural, social-economic regions in quarter 1, 2015

Unit: %

Basic characteristic	Proportion of Labor force				Labor force participation rate		
	Total	Male	Female	% Female	Total	Male	Female
Whole country	100.0	100.0	100.0	48.1	77.3	82.6	72.4
Urban	31.6	31.5	31.7	48.3	70.9	76.9	65.5
Rural	68.4	68.5	68.3	48.1	80.7	85.5	76.1
Social-economic region							
Northern Midlands and Mountains	13.5	13.1	13.9	49.6	84.6	87.0	82.4
Red River Delta	21.9	21.1	22.8	50.1	74.5	77.4	71.8
<i>Of which:</i> Hanoi city	7.0	6.8	7.2	49.7	70.0	73.1	67.1
North and South Central Coast	21.8	21.5	22.1	48.9	77.9	82.0	74.0
Central Highlands	6.2	6.2	6.2	48.4	83.5	87.9	79.3
Southeast	17.2	17.6	16.8	46.9	74.1	82.0	66.8
<i>Of which:</i> Hochiminh city	8.2	8.3	8.1	47.4	69.9	78.2	62.5
Mekong River Delta	19.3	20.4	18.1	45.1	76.5	85.3	67.9

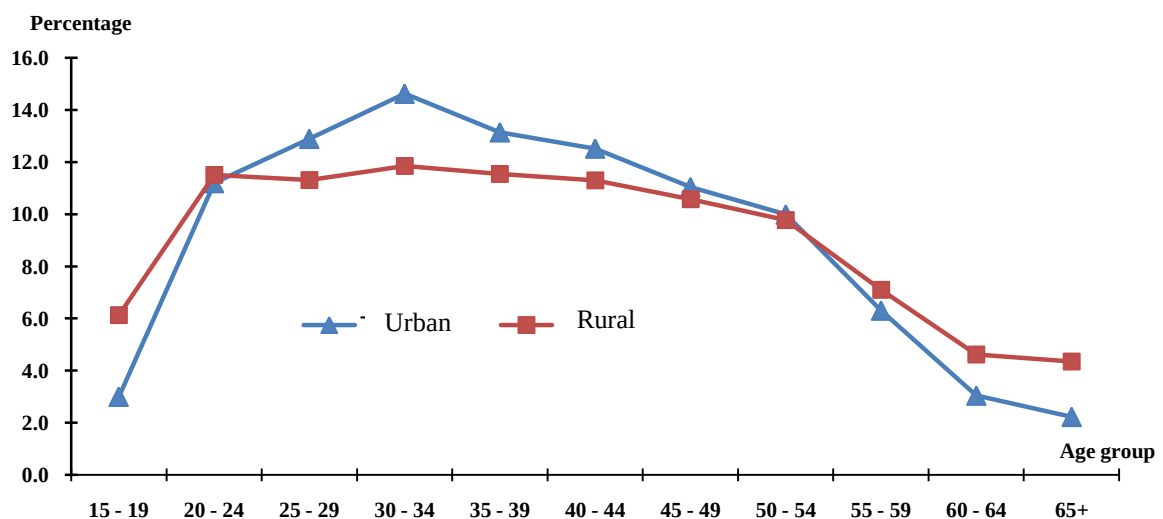

At the national level, the labour force participation rate was 77.3%. The considerable difference on labour force participation between rural and urban has remained about 9.8 percentage points (70.9% against with 80.7%).

The labour force participation rate for females stood at 72.4%, with 9.8 percentage points lower than that for males (82.6%). Notably, the highest labour force participation rates were for two mountainous regions, including Northern Midlands and Mountains (84.6%) and Central Highlands (83.5%). Meanwhile, the lowest ones belonged to two most developed social-economic centres of Vietnam, namely Hanoi and Hochiminh city.

1.2 Age structure of labour force

The distribution of the labour force by age group reveals not only the context of demographic fact but also of social-economic situation. The labour force of Vietnam is considered as relatively young, with the considerable share of the 15-39 year old group (currently accounting for 53.1% of total labour force).

Figure 1: Percentage distribution of labour force classified by age group and urban/rural in quarter 1, 2015

There was considerable difference in age structure of the labour force between urban and rural areas (as shown in Figure 1). The shares of youth (aged 15-24) and elderly (aged 55 and above) living in urban areas were found lower than those of rural areas. In contrast, the proportion of prime working age group (aged 25-54) in urban areas was higher than that of rural areas. This pattern could reflect the fact that the urban youth has joined into the labour market more lately than the rural youth, due to their longer period of schooling. Meanwhile, the rural residents has joined earlier but stayed longer in the labour market, as a result of characteristics on rural jobs.

2. Employment

Table 2 shows the employment proportion and the employment-to-population ratio for those people aged 15⁺, classified by sex and 8 sampling domains (including 6 social-economic regions and 2 biggest cities) in the first quarter of 2015. Out of 52.4 million employed labourers, 68.7% (equivalent to 36.0 million persons) was residing in rural areas and 48.2% (equivalent to 25.3 million persons) was employed females. Making a comparison among social economic regions, the Red River Delta has currently occupied the largest relevant proportion, about 21.9% of total employed population, followed by the North and South Central Coast, and Mekong River Delta (21.7% and 19.2% respectively).

Table 2: Employment proportion and employment to population ratio for those people aged 15+, classified by urban/rural and social economic regions in quarter 1, 2015

Unit: %

Basic characteristic	Proportion of employed pop.				Employment to pop. ratio		
	Total	Male	Female	% Female	Total	Male	Female
Entire country	100.0	100.0	100.0	48.2	75.6	80.7	70.8
Urban	31.3	31.2	31.4	48.3	68.6	74.3	63.4
Rural	68.7	68.8	68.6	48.1	79.2	83.9	74.7
Social-economic region							
Northern Midlands and Mountains	13.7	13.3	14.1	49.7	83.7	86.0	81.6
Red River Delta	21.9	21.0	22.9	50.3	72.8	75.2	70.5
<i>Of which:</i> Hanoi city	7.1	6.8	7.3	49.9	68.7	71.4	66.2
North and South Central Coast	21.7	21.4	22.1	48.9	75.9	79.8	72.2
Central Highlands	6.3	6.3	6.3	48.2	82.6	87.1	78.2
Southeast	17.1	17.6	16.6	46.8	72.0	79.8	64.8
<i>Of which:</i> Hochiminh city	8.2	8.3	8.0	47.3	67.8	76.0	60.5
Mekong River Delta	19.2	20.4	17.9	44.9	74.6	83.5	66.0

In details, as of Quarter 1, 2015, the employed population was estimated about 52.4 million people, lowering nearly 1 million people (equivalent to minus 1.9%) as compared to that of Quarter 4, 2014. Among 6 social economic

regions, 5 regions had number of employed persons decreased, (ranging from 1% to 3.5% lower than that of Quarter 4, 2014. The highest employment decline was for the Northern Midlands and Mountains (-3.5%), followed by the Red River Delta (-3.3%). Particularly for the Southeast, there was an increase of employed laborers, about 2.1% higher as compared to that of Quarter 4, 2014. 84.4% of that addition was contributed by Hochiminh city.

The employed-to-population ratio for those who are 15 years old and above was at 75.6% in quarter 1, 2015. Urban-rural and sex gaps on this ratio were nearly 10.7 and 9.9 percentage points, respectively. Comparing among social economic regions indicated that the highest employment-to-population ratios belonged to two mountainous regions, namely the Northern Midlands and Mountains (83.7%) and the Central Highlands (82.6%), while two most developed social- economic centres, including Hanoi city and Hochiminh city occupied the lowest ones.

Table 3: Percentage distribution of employed population classified by industrial sector and economic sector in quarter 1, 2015

Unit: %

Basic characteristic	Industrial sector			Economic sector		
	Agriculture, forestry and fishery	Industry and construction	Services	State	Non-state	Foreign investment
Entire country	45.0	21.5	33.5	10.2	85.3	4.5
Urban	12.5	25.3	62.2	18.6	75.4	6.0
Rural	59.8	19.8	20.4	6.3	89.9	3.8
Sex						
Male	43.5	24.5	32.0	10.3	86.9	2.9
Female	46.6	18.3	35.1	10.1	83.7	6.2
Social-economic region						
Northern Midlands and Mountains	68.8	13.8	17.4	9.6	88.1	2.3
Red River Delta	32.5	27.4	40.1	13.5	82.1	4.4
Of which: Hanoi city	18.3	24.2	57.5	19.9	77.1	2.9
North and South Central Coast	52.7	17.3	30.0	10.1	88.2	1.6
Central Highland	76.5	6.8	16.7	8.8	90.9	0.3
Southeast	13.8	35.4	50.8	10.7	75.3	14.1
Of which: Hochiminh city	2.3	32.6	65.1	12.9	81.6	5.5
Mekong River Delta	50.9	17.5	31.6	6.8	91.0	2.1

Table 3 presents the proportion of employed population classified by industrial sector for each sampling domain. The data shows that the Southeast

region, especially including Hochiminh city has the most advanced economic structure, proportion of industrial, constructional or service workers (about 86.2% and 97.7%). % respectively). Contrarily, for the mountainous and coastal areas, the proportion of employed labourers engaging into agriculture, forestry and fishery, has remained quite high. The Central Highlands has been regarded as the region occupying this largest proportion (about 76.5%), followed by the Northern Midlands and Mountains and the North and South Central Coast (68.8% and 52.7%, respectively).

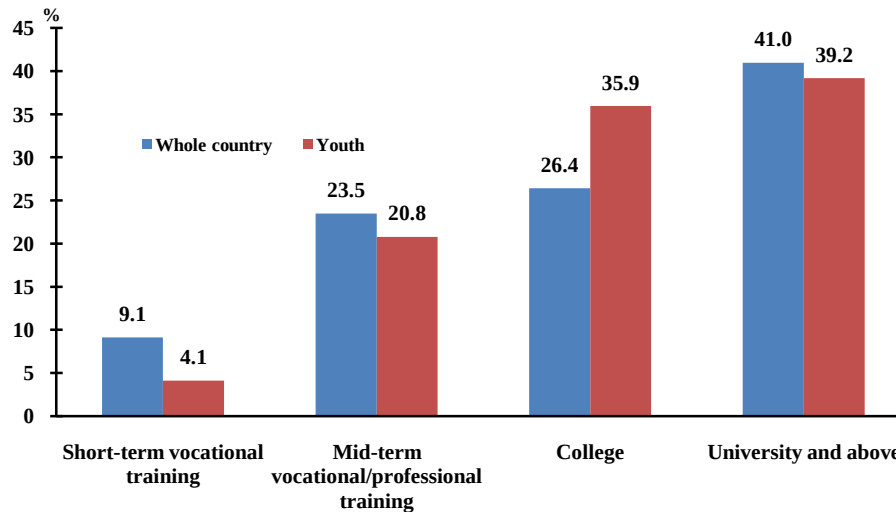

3. Underemployment and unemployment

3.1 Underemployed and unemployed labourers

As of Quarter 1, 2015, the labour force aged 15 and above was constituted by more than 1.2 million underemployed labourers and a nearly similar number of unemployed labourers. As compared to Quarter 4, 2014, the underemployed population increased slightly with the addition of 32 thousand persons and particularly, about 230.6 thousand new unemployed persons were added. The underemployment has been considered as more popular in rural areas. At present, about 84.7% of total underemployed population was residing in rural areas. Besides, the share of underemployed males was found higher than that of females (54.1% as compared to 45.9% of total underemployed population). On the other hand, the unemployment in urban areas should be concerned more even that the proportion of urban unemployed population was found lower, just accounting for 45.5% of total unemployed population (see part 3.2 – unemployment and underemployment rates for more reference). Moreover, the data of Quarter 1, 2015 also shows that unemployed males were more crowded than females (accounting for 53.0% verse 47.0% of total unemployed population).

Observing the unemployment by the technical/qualification attainment reveals that in Quarter 1 2015, more than one third of unemployed population have undergone technical/qualification training from 3 months or more. Among this group, those unemployed laborers, who have graduated from universities or above, occupied the largest share (about 41.0%).

Figure 3: Percentage distribution of unemployed population aged 15+ and unemployed youth who have undergone technical/qualification training from 3 months or more. classified by levels of training in quarter 1. 2015

Youth is considered as one labour group most vulnerable to the fluctuations in labour market. Thus, youth's unemployment has become important issue that should be paid attention in the society. In quarter 1. 2015 the unemployed youth aged from 15-24 accounted for 48.2% of total unemployed population throughout the country. Remarkably, the share of unemployed youth residing in urban areas was found lower than that of rural areas (accounting for 44.9% against with 55.1% of total unemployed population). as a result of more educational opportunities given by urban areas. In term of technical/qualification attainment, about 60.7% of total unemployed laborers who have undergone technical/qualification training from 3 months or more (equivalent to 268.9 thousand persons) were young ones. Of which, a dominant share (accounting for 75.1%) was formed by the young laborers who have graduated from college or above.

In addition, about 25.9% (equivalent to 315 thousand persons) of total 1.2 million under-employed workers throughout the country were young persons aged 15 - 24.

3.2 Underemployment rate and unemployment rate

The working age underemployment and unemployment rates are referred

to those females who are from 15 to 54 years old and those males who are from 15 to 59 years old.

As of quarter 1. 2015. the working age unemployment rate for the whole country reached to 2.43%. Of which. the urban unemployment rate (standing at 3.43%) was found higher than that of rural areas (1.95%). Sex gap on unemployment rate was not considerable. just 0.03% percentage points. However. among sampling domains. the unemployment rate was quite different. The region occupying the lowest rate was the Northern Midlands and Mountains (1.15%). followed by the Central Highland (1.18%). North and South Central Coast and The Southeast are two regions had the highest unemployment rate. respectively. 2.89% and 2.86%.

Table 6: Working age underemployment and unemployment rates classified by quarter. 2014 and 2015

Unit: %

Basic characteristic	Underemployment rate				Unemployment rate			
	Quarter 2/2014	Quarter 3/2014	Quarter 4/2014	Quarter 1/2015	Quarter 2/2014	Quarter 3/2014	Quarter 4/2014	Quarter 1/2015
Whole country	2.25	2.30	2.32	2.43	1.84	2.17	2.05	2.43

Northern Midlands and Mountains	1.36	1.19	1.60	1.98	0.65	0.83	0.74	1.15
Red River Delta	2.86	2.24	2.25	2.07	2.35	3.02	2.90	2.59
North and South Central Coast	2.15	2.24	2.88	3.55	1.86	2.38	2.14	2.89
Central Highland	2.49	3.72	1.50	1.67	0.94	1.23	1.25	1.18
Southeast	0.42	0.71	0.62	0.74	2.44	2.42	2.16	2.86
Mekong River Delta	3.86	4.26	4.12	3.78	1.85	2.04	2.08	2.69

The working age under-employment rate for the whole country increased slightly in Quarter 1. 2015 in a comparison with that of Quarter 4. 2014 (2.43% against with 2.32%. respectively). The under-employment rate in rural areas stood at 3.04%. equal to nearly 2.7 times higher than that of urban areas (1.15%). Among regions. the Mekong River Delta has remained occupying the highest rate (about 3.78%). (equivalent to 1.6 times higher than that of whole country – standing at 2.43%).

At present. even that Vietnam's economy has met difficulties. the unemployment rate in Vietnam has not changed much. Particularly. the working

age unemployment rate in urban areas has almost unchanged. just slightly declining from 3.72% in Quarter 1. 2014 to 3.43% in Quarter 1. 2015. This could be explained in part by the fact that Vietnam is an agricultural country. characterized with the less developed economy. resulting to the people's low living standards and the insufficiently developed social security system. Therefore. people prefer involving into any kind of jobs. even into the informal ones giving unstable. low earnings and indecent working conditions. in order to support themselves and their families. rather than being into long-term unemployment to look for better jobs.

The young unemployment rate calculated for those persons aged 15-24. In urban areas. the youth's unemployment rate was found 5.5 times higher than that of those people aged 25 and above (10.95% verse 1.99%). In quarter 1 2015. the young unemployment rate has almost unchanged. just 0.74 percentage points lower than that of the same period last year.

Table 8: Youth's unemployment rate and Unemployment rate of those who are 25 years old and above classified by quarter in 2014 and 2015

Unit: %

In Quarter 1. 2015. the unemployment rate of young group who have completed technical/qualification training from 3 months or more. stood at 14.1%. of which the unemployment for young females was considerably higher than that for young males (16.3% verse 11.6%). This was similar when comparing the unemployment between urban and rural (16.5% against with 12.3%). Notably. the youth's unemployment is likely increased along with their level of technical/qualification attainment. that is. more concerns on unemployment should be paid for those young people who have attained high technical/qualification level. For example. the unemployment rates of those young people who have graduated from college or university and above were found about 15.1% and 19.9%. respectively. Whereas this rate was much lower for those groups who have just completed "short-term vocational education" or "mid-term vocational/professional education (standing at 4.6% and 11.3%). The reason could be that those young people having high educational attainment (such as college. university or above) are often from 20 to 24 years old. have just graduated and lack of experiences. Therefore. they will meet difficult to find suitable jobs.

Table 9: Unemployment rate of the youth who have undergone technical/qualification training from 3 months and more. classified by level of training. Quarter 1. 2015

Unit: %

Technical/qualification level	Whole country	Male	Female	Urban	Rural
Total	14.09	11.56	16.34	16.47	12.31
